

Special Event Response Team

S.E.R.T.

Construction
Security
Management

Theft and Vandalism from construction sites are a costly and significant source of loss to all contractors. Items including copper wire, asphalt products, shingles, tools and appliances are commonly taken from construction sites, as prices of these materials rises.

At **S.E.R.T. Security Management Resources**, we provide **specialized construction site security, with static, mobile patrols and CCTV applications.**

Our members are highly trained security professionals with First Aid, BEM and many with Safety Training.

Theft and vandalism from construction sites is expensive, prevention is easy. Ask us how we can save you money!
